

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

THE ADMINISTRATOR

Mr. Seichi Sudo
President and Chief Operating Officer
Toyota Motor Engineering and Manufacturing, Inc.
25 Atlantic Drive
Erlanger, Kentucky 41018

Dear Mr. Sudo:

On behalf of the U.S. Environmental Protection Agency, I congratulate you on being selected as a 2008 ENERGY STAR Sustained Excellence Award winner.

This prestigious award is given to a select number of organizations that have made a long-term commitment to protecting the environment through energy efficiency and have demonstrated outstanding success with ENERGY STAR. Your efforts and leadership are as important as ever to address high energy prices and the challenges posed by climate change. We congratulate you on setting goals and executing innovative approaches that have distinguished your organization in the ENERGY STAR program. Your consistent participation with ENERGY STAR is making a difference in the overall benefits to the environment and is helping create an energy efficient society.

I am pleased to report that your efforts, along with the efforts of others, are really adding up. The ENERGY STAR label can now be found on more than 50 types of products, as well as new homes, schools, and commercial buildings. Last year alone, with the help of ENERGY STAR, Americans saved enough energy to power 12 million homes and reduce greenhouse gas emissions equivalent to that of 27 million vehicles – all this for the environment while saving \$16 billion in energy bills.

We appreciate your continued leadership in ENERGY STAR. Again, my congratulations.

Sincerely,

A handwritten signature in black ink, appearing to read "S. L. Johnson", is written over the typed name.

Stephen L. Johnson

Toyota Motor Engineering and Manufacturing North America, Inc.

Sustained Excellence

Toyota Motor Engineering and Manufacturing North America, Inc. Erlanger, Kentucky

Toyota Motor Engineering and Manufacturing North America, Inc., the North American manufacturing headquarters for Toyota vehicles, has long been known for quality products and innovation. As a top business priority, Toyota's high standards of energy management earned the company its third ENERGY STAR Sustained Excellence recognition. Key accomplishments include:

- Achieving an absolute reduction of nearly 4 percent in the amount of energy required to power its operations during 2007, with overall reductions of 16 percent per vehicle in the last 4 years, all while building new plants.
- Earning the ENERGY STAR label on eight Toyota assembly plants in the last 2 years, including the Georgetown, KY, plant, which produces more than 500,000 vehicles and engines annually.
- Piloting a new energy campaign called "Green Weekend" during which Toyota shuts down a manufacturing facility and realizes significant reductions in energy use.
- Expanding energy efficiency efforts to suppliers and their energy requirements, including performing 15 "treasure hunts"-a successful plant energy self-assessment process-with 60 different suppliers to identify efficiency opportunities.
- Continuing to train other ENERGY STAR partners in performing "treasure hunts" in their facilities.

Toyota set a new goal of reducing energy consumption by 2.7 percent per unit annually between 2007 and 2011. In addition, Toyota helped EPA advance the state of strategic energy management with the corporate planning guide *Energy Strategy for the Road Ahead* by volunteering staff and executive level experts to help identify the critical energy strategies senior executives need to succeed in the future.

Congratulations to the 2008 ENERGY STAR Award Winners!

On April 1, EPA and DOE honored businesses and organizations for their outstanding contribution to reducing greenhouse gas emissions through energy efficiency at the 2008 ENERGY STAR Awards ceremony.
